🔄 Movin21

Profile

Third-year Software Engineering student with a strong foundation in full-stack development and growing enthusiasm for DevOps practices. Experience leading university project teams while implementing Agile methodologies and version control systems. Proficient in Linux environments and familiar with Terraform for infrastructure as code. Currently exploring cloud platforms, containerization, and CI/CD concepts through self-directed learning. Developing skills in Site Reliability Engineering by focusing on automation, monitoring, and system reliability. Quick learner and adaptable team player seeking real-world DevOps experience through internship opportunities while continuing to develop technical expertise in software development.

Technologies

Languages: Java, Python, TypeScript, JavaScript

Frameworks & Libraries: Express.js, Next.js, React Native, React.js, Redux, Node.js, Tailwind CSS

Databases: MongoDB, MySQL, Oracle SQL (RDB, OODB)

DevOps: AWS (EC2/EKS/S3/Lambda/API Gateway/CloudWatch), Azure (AKS), Docker, Kubernetes, Terraform, Git, Jenkins, Argo CD, GitHub Actions

Scripting: Python, Bash

Core Concepts: OOP, SOLID Principles, Data Structures, Algorithms, Design Patterns

Development Tools: VS Code, Postman, Azure CLI, AWS CLI

Projects

CodeFusion - Interactive Web-based Programming Environment

- Developed a cloud-based programming education platform using MongoDB, Express.js, React, and Node.js.
- Implemented real-time code validation using AWS Lambda and integrated Meta-LLaMA-3-70B-Instruct model.
- Designed RESTful APIs following SOLID principles and implemented comprehensive error handling.

AWS Project - Serverless API Management Platform

- Developed a serverless platform utilizing AWS Lambda and API Gateway for scalable and cost-effective API management.
- Designed and exposed Lambda functions through AWS API Gateway, ensuring secure and reliable API integration.
- Configured usage plans and API keys to restrict access and manage quotas effectively.
- Integrated AWS CloudWatch for monitoring and analyzing logs, enabling seamless debugging and performance insights.

CI/CD Pipeline with Docker and Jenkins

- Set up a CI/CD pipeline to automate building, testing, and deploying applications.
- Configured Jenkins to monitor GitHub repositories and trigger builds on new commits.
- Automated Docker image creation and pushing to DockerHub using Jenkins.
- Implemented GitHub notifications for build status visibility.

DevOps Capstone Project

- Developed a web application using Next.js for users to submit URLs.
- Created a FastAPI backend to generate QR codes and store them in an AWS S3 bucket.
- Implemented local deployment instructions for both the API and front-end servers.
- Explored DevOps practices like containerization, CI/CD, and monitoring.

Education

SLIIT , BSc in Information Technology specailizing in Software Engineering	Aug 2022 – Present
• CGPA: 3.54/4.0 • 3rd Academic Year	
University of Moratuwa - Center for IT Services ,	Dec 2024 – Present
• AWS Certified Cloud Practitioner Certification(CLF-02) Training	
Thurstan College	Jan 2012 – Oct 2020
• GCE Advanced Level (Physical Sciences)	

Experience

Software Engineering Student Community SLIIT , Devolopment Team Volunteer	Malabe, Sri Lanka
• Contributed to the development of competitive programming questions, implementing data structures and algorithmic challenges for SLIITXtreme 3.0. • Developed and implemented the real-time leaderboard system for SLIITXtreme 3.0 programming competition. • Currently contributing to the development of SESC Blog.	Aug 2024 – Present

Certifications

- **AWS Certified Cloud Practitioner Certification(CLF-02)** - UOM - *Currently Enrolled (In Progress)*
- **DevOps/TechOps Industrial Expert Masterclass Course (Linux related)** - IDET.lk - *Currently Enrolled (In Progress)*
- **Introduction to DevOps and SRE (LFS162)** - The Linux Foundation (CNCF)
- **Google Cloud Fundamentals: Core Infrastructure** - Google Cloud Provider
- **Getting Started with DevOps on AWS** - Amazon Web Services Online Training
- **Kubernetes Crash Course (Labs)** - KodeKloud
