

HASEEF AHAMED

Infrastructure Engineer – Intern @ Enadoc Pvt Ltd
mshaseefat@gmail.com | +94 772939059 | [LinkedIn](#) | Colombo

Objective

A highly motivated Infrastructure Engineer Intern with hands-on experience in optimizing system performance, automating deployments, and ensuring high availability across cloud environments. Proficient in Docker, Azure DevOps, Kubernetes, and container technologies, with a strong foundation in infrastructure-as-code tools like Terraform. With a background in network administration and programming skills in Python and Java, I am eager to contribute to the Sitecore platform's scalability and performance. I am excited to leverage my skills to support Sitecore's dynamic DevOps culture and assist in the operation of multi-tenant SaaS products at IFS, driving innovation and operational excellence.

SKILLS

- Languages : English (Fluent), Tamil (Native), Sinhala (Intermediate)
- Technical Skills : Azure Kubernetes Service (AKS), Docker, Kubernetes, Containerization, Terraform, Bash Scripts, CI/CD pipelines, Azure DevOps, Python, Java, C++, Linux, Networking, System Administration, Technical Support, Performance monitoring, Incident resolution, System Capacity management, HTML, CSS
- Core Skills : Communication, Team Collaboration, Problem-Solving, Time Management, Analytical Thinking, Monitoring and Analysis, Adaptability, Agile Management

EXPERIENCES

Infrastructure Engineer Intern Enadoc Pvt (Ltd)

2024/06/24 – Present

- Monitored and optimized system and container performance using Prometheus, Node Exporter, Loki, Promtail, Pushgateway, CAdvisor, and Grafana, ensuring high availability and performance in cloud environments.
- Collaborated with development and operations teams to streamline CI/CD pipelines, leveraging Docker and Docker Compose for efficient, scalable application deployment.
- Managed security and compliance for Docker containers and Azure VMs, ensuring industry standards and best practices in infrastructure security.
- Deployed and managed cloud infrastructure on Azure, including setting up and hosting Docker containers to support multi-tenant SaaS applications.
- Automated deployments and pipeline triggers with Azure DevOps and YAML, improving operational efficiency and accelerating delivery cycles.
- Developed Dockerfiles for .NET and Angular applications, optimizing build processes and improving application performance in containerized environments.

Network Administrator	
WinSYS Network Pvt Ltd	2023/10/16 – 2024/04/24
• Network Design and Planning for Office Network setup & Configuration • Hardware and System Maintenance • Server Configuration & Virtualization • Virtualization Management • System Security and Network Administration • Customer Satisfaction Enhancement • Enhanced Windows Servers for Optimal Performance and Security • Streamlined OS Installation and Troubleshooting Processes	

EDUCATION

LONDON METROPOLITAN UNIVERSITY	2023/09 – 2024/09
• BEng (Hons) Computer Networking & Cloud Security	
ADVANCED TECHNICAL INSTITUTE (SLIATE)	2020 – 2023
• HND in Information Technology (Administrative Track)	
MICROSOFT	
• Azure Administrator	2019/09
• Microsoft Certified Solution Associate (MCSA) - Windows Server 2016	2019/07
WINSYS NETWORK PVT LTD	2019/02 – 2019/11
• Cisco Certified Network Associate (CCNA R&S) • Windows Network Engineering Certification	

PROJECT

Hybrid Cloud Scalable Web Services and Disaster Recovery	
Case Study Project ESOF Metro Campus	2023/09/08 – 2024/05/05

Project Overview:

- Developed a hybrid cloud solution integrating Microsoft Azure with on-premise infrastructure to enhance scalability and disaster recovery for educational institution operations.

Key Contributions:

- Designed a scalable, cost-efficient hybrid cloud architecture.
- Formulated disaster recovery strategies with cloud-based backups and automated failover.
- Conducted cost-benefit analysis to optimize resource allocation.

Technologies Used:

Microsoft Azure, VPN, IAM, Data Encryption, Network Security, Automated Failover Systems
